### ■ Overview

Industrial serial ports on USB connect RS-422 and RS485 devices, used in industrial environment. With RS-485 the data direction is controlled by the port, without further action from the software. The high speed serial port with the 128 byte FIFO allow high speed communication, even in heavy loaded systems. Unique features reduce the system load. The serial port also allows unusual speed settings like 500.000bps.

### ■ Hardware Specifications

<b>Ports</b>	One RS422/485 port
<b>Speed</b>	up to 921.6kbps
<b>RS422/485 signals</b>	RS422 TxD+/-, RxD+/-, RTS+/-, CTS+/-, GND RS485 Data+/-, GND
<b>Power</b>	USB bus powered, no external power supply
<b>Driver</b>	Windows 98, ME, 2000, XP, 2003 Server Linux (Kernel 2.4 and up built-in)
<b>Connectors</b>	one DB9 male
